WORK EXPERIENCE

Lead Full Stack Engineer & UI/UX Designer | DefTechLink

May 2025 – Jul 2026

- Led the UI/UX design process using Figma, translating wireframes into responsive, accessible interfaces using React, Material UI, and reusable design systems.
- Developed and maintained two B2B SaaS platforms (DefTechLink and DefTechDash), delivering full-stack features across React frontends, Flask REST APIs, PostgreSQL databases, and backend services.
- Built a scalable React component system featuring reusable cards, tables, filters, dialogs, and skeleton loaders, implementing dynamic filtering, debounced search, pagination, role-based views, optimistic UI updates, and Flask REST API integration using TanStack Query.
- Developed the Learn content pipeline, enabling creators to draft, edit, preview, and schedule content through a custom HTML editor or PDF/video uploads.
- Integrated Stripe Embedded Checkout with tier-based access control and user state synchronization.
- Collaborated in Agile sprints, contributing to planning, standups, and iterative delivery cycles.

Software and Data Engineer Intern | SMX

Jun 2024 – Aug 2024

- Built and deployed NLP-based sentiment analysis pipelines using spaCy, Regex, and Hugging Face's RoBERTa in AWS WorkSpace, leveraging PostgreSQL for data storage and querying.
- Conducted data collection, preprocessing, geospatial plotting, and visualization using Grafana, transforming raw data into actionable insights.
- Presented findings to senior executives, including the CEO, resulting in actionable insights.

EDUCATION

UNIVERSITY OF SOUTH FLORIDA | Tampa, FL

Aug 2021 – May 2025

Bachelor of Science in Computer Science

Cumulative GPA: 3.89

Certifications: Web Development (HTML/CSS/Bootstrap, JavaScript & APIs), Intercultural Skills

SKILLS

Languages:	Python, JavaScript, HTML/CSS, C/C++, Java, SQL
Frontend:	React, Material UI, TanStack Query, Bootstrap, TipTap, Electron.js
Backend:	Flask, SQLAlchemy, REST APIs
Data & Big Data:	PostgreSQL, SQLite, Hadoop
Tools:	Git (GitHub, GitLab), Figma, AWS WorkSpaces, Linux/macOS
Methodologies:	Agile, Scrum, UML

KEY PROJECTS

Morph | *ReactJS, MUI, Vite, FFmpeg.wasm, pdf-lib, pdf-js, WebAssembly, Figma* | [Live Demo](#) | [GitHub](#)

- Designed and developed a browser-based file transformation toolkit supporting file conversion, compression, and PDF merging through a workflow-driven interface.
- Implemented client-side file processing using WebAssembly-based libraries while building responsive UI components for uploads, progress tracking, previews, and batch workflows.

SunnySide Weather | *ReactJS, Electron.js, Node.js, Express, SQLite, HTML/CSS, MUI, Vite* | [GitHub](#)

- Developed a cross-platform desktop weather app using React and Electron with persistent city storage, Open-Meteo/Geocoding integration, and food-mood pairing recommendations.
- Built an Express + SQLite backend with CRUD support, caching, and a Figma-designed UI with custom assets.

Tic-Tac-Poké | *ReactJS, Electron.js, HTML/CSS, Vite* | [GitHub](#)

- Built a Pokémon Tic-Tac-Toe desktop app using React and Electron with Figma-designed UI and Procreate assets.
